### **DETAILED ACTION**

1. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose or make obvious the claimed actuator assembly for a firearm. Specifically, the prior art fails to show an actuator that comprises a unitary trigger assembly, a measuring device position adjacent the trigger for measuring a force and generating a trigger signal, a compensating system for compensating inadvertent trigger signals (including a second sensor in one embodiment), and a controller in communication with the measuring device and compensating system to process the trigger signal and initiate the operational sequence in response to a valid trigger signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Claims 1-7, 10-13, 18-20, and 39-45 allowed.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lenner et al is cited as being of interest since they disclose trigger actuation system.
